

PROFESSIONAL SUMMARY

Versatile professional with a dynamic skill in web development. With five years of hands-on experience in web development, I bring technical expertise adept at problem-solving, teamwork, and effective communication.

TECHNICAL SKILLS

Programming Languages: JavaScript
Web Technologies: Node.js, React JS, Express, CSS, HTML, Bootstrap, Tailwind
Content Management Systems: Wordpress
Databases: MongoDB, Microsoft SQL, Oracle
Office Applications: Microsoft Excel, Microsoft Word

Certificates: Full-Stack Web Development with Node JS

EMPLOYMENT HISTORY

Web Developer / Graduate Intern OCT, 2022 – OCT 2023
Rework Technologies Limited, Abuja

- Collaborated with cross-functional teams to translate design concepts into fully functional websites, ensuring seamless integration of front-end and back-end systems.
- Optimized website performance by implementing responsive design principles, resulting in a 35% reduction in page load times and a 65% increase in user satisfaction.
- Utilized the use of technologies, such as React.js, for improving website functionality and user experience.
- Utilized JavaScript, Bootstrap, CSS, and HTML to create interactive and responsive user interfaces, enhancing user experience.
- Implemented Restful APIs to facilitate seamless communication between the front-end and back-end systems.

National Youth Service Corps SEP, 2019 - SEP, 2020
Federal Inland Revenue Service, Abuja

- Assisted in the design and implementation of training programs to enhance the skills and knowledge of the National Youth Service Corps members in tax administration and revenue generation.
- Conducted outreach programs to educate young taxpayers about their tax obligations and the benefits of compliance. Collaborated with other departments to develop and implement strategies for increasing tax compliance among National Youth Service Corps members.
- Collaborated with other government agencies to streamline tax administration processes and improve revenue generation.
- Assisted in the creation and maintenance of a database for tracking tax compliance among National Youth Service Corps members.

Front End Developer / Intern SEP, 2018 - JUN, 2019
Juvenix Nigeria Limited, Abuja

- Acquired foundational skills in HTML, CSS, JavaScript, and other web technologies during this early stage of your web development career.
- Contributed to the creation of responsive and user-friendly interfaces by using JavaScript frameworks, Bootstrap & CSS.
- Collaborated with senior developers to design and develop web applications.

PROJECTS

Neophyte Garment App

1. Utilized React JS, Bootstrap, and JavaScript to develop a user-friendly e-commerce web application for Neophyte Garment, a prominent clothing brand. The project involved designing and implementing various features to enhance the shopping experience for users.
2. Utilized RESTful APIs to fetch product data dynamically and integrate with backend services.
3. Developed functionalities like product listings, search capabilities, and user authentication. Employed modern methods like the fetch API or libraries like Axios for asynchronous communication with the server, ensuring efficient retrieval and display of product data, seamless user login processes, and smooth handling of "add to cart" functionality.

Imgur Project

1. Designed and implemented a RESTful API using Node.js to support various functionalities of the application, including user authentication, image uploading, liking, commenting, and fetching image data.
2. Utilized the custom Node.js API endpoints to handle requests from the frontend, enabling seamless interaction between the client-side React application and the backend services.
3. Developed a React-based web application inspired by Imgur, incorporating key features such as user authentication, image upload, tagging system, liking and disliking, and commenting.

Pandovic Scholarship App

1. Developed a web-based Scholarship Application platform to streamline the scholarship application process for students. This application allows students to enter their personal details, academic grades, and other relevant information to determine their eligibility for various scholarship programs.
2. Implemented dynamic form fields for personal information and academic details, allowing students to input their credentials efficiently. The application dynamically calculates points based on the provided information, including academic performance, age, and country of origin, to determine scholarship eligibility.
3. Utilized Axios for asynchronous HTTP requests to the backend server, enabling real-time data fetching and display of applicant details and scholarship status.

EDUCATION

NOV, 2014 - OCT, 2018

Bachelor of Arts: History and Diplomatic Studies, University of Abuja, Abuja
